

## Why AGCompass?

AGCompass is a software as a service (SaaS) provider that has been helping small businesses implement IT solutions since 2003. Our founders, Ken Wedig and Ev Chambers, have decades of experience in networking, IT systems and business consulting. While our roots are in the agriculture industry, we have worked with businesses in all industries, from CPA firms to trucking companies, printing companies and car dealerships. You can feel confident that we understand the challenges of small businesses, and have the expertise to effectively manage your IT systems while providing you with the support you need.

## Move to the Cloud

Cloud-based IT solutions are a proven, cost-effective way to manage your network while allowing your team to focus on your core business.

## Try it and See

For a no-obligation, 30-day trial of AGCompass Cloud, visit our website at [www.agcompass.com](http://www.agcompass.com), or contact us for more information about how cloud computing can transform your business.
